EXPERIENCE

M37Labs

May 2025 – Present

Full Stack Engineer

- Architected and delivered an **intelligent risk monitoring dashboard for PR industries**, owning end-to-end system design, backend development, and AI integration.
- Designed multi-tenant architecture with strict tenant isolation, scoped RBAC, policy-driven permissions, and configurable organization hierarchies.
- Built model orchestration layer routing inference requests across LLM providers dynamically based on task type, latency SLAs, and cost constraints; integrated local models for privacy-sensitive workloads.
- Developed FastAPI microservice for AI inference workflows and built a unified voice + chat agent supporting multi-turn memory, tool calling, streaming STT/LLM/TTS, and low-latency interruption handling.
- Implemented Celery-based distributed task queues to scale asynchronous workloads across workers, improving system throughput and reliability.
- Took over backend ownership of a **full-stack Clienteling application for a leading Indian jewellery brand**; developed new FastAPI endpoints, resolved production bugs, and managed deployments on Azure with Jenkins-based CI/CD pipelines.
- Contributed in building an **automated image processing pipeline for a visual configurator for one of India's leading fashion retail groups**, leveraging SAM (Segment Anything Model) and state-of-the-art image generation models to produce multiple views and folds of clothing items for use by retail visual merchandisers.

AGIE AI Technology

August 2024 – December 2024

Backend AI Engineer

- Built and deployed RAG pipelines and agentic workflows using LangChain, LlamaIndex, and open-source LLMs; integrated vector databases and Google Dialogflow for conversational AI features.
- Designed and shipped RESTful APIs; deployed services on AWS EC2 with MongoDB as the primary database.

INTERNSHIP EXPERIENCE

Indian Institute of Technology, Hyderabad

January 2024 – August 2024

Research Intern

- Worked on an optimization model for a fresh food supply chain management system.
- Used cplex solver in python for optimization and also contributed to academic writing.

Warpvelocity Technology

June 2023 – August 2023

Backend Developer Intern

- Created end-to-end bots in Automation Anywhere following industry best practices.
- Gained in-depth understanding of the Software Development Life Cycle (SDLC) for RPA (RDLCL).

Let India Breathe

June 2022 – September 2022

Volunteer Web Developer

- Worked on the organization's website using NextJS and Contentful CMS; used RESTful APIs and GraphQL for dynamic rendering.

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, PHP

Frameworks: ReactJS, NextJS, NodeJS, ExpressJS FASTAPI, Django, LangChain, TensorFlow

AI/ML: LLM Fine-tuning, RAG, Agentic Workflows, OpenAI Agents SDK, HuggingFace, Vector Databases, Ollama

Infrastructure & Tools: AWS (EC2, S3, Lambda, RDS, SES), MongoDB, PostgreSQL, Celery, GraphQL, Docker, Jenkins, Vercel

PROJECTS

Mealprep Samui | PHP, Javascript, Custom Wordpress theme building, Google Maps API

- Designed and deployed a responsive online meal ordering platform optimized for real-time delivery validation.
- Built a custom PHP-driven WordPress theme implementing application logic beyond standard CMS capabilities.
- Developed a location-aware checkout system integrating Google Maps APIs to validate delivery zones.
- Implemented automatic address autocomplete and geocoding for improved user experience.
- Integrated secure payment gateway processing into the checkout workflow.
- Developed custom backend PHP modules and frontend JavaScript features to support dynamic ordering functionality.

CorLing: Pronunciation Correction Web App | Django, JavaScript, REST API, Azure Speech

- Smart India Hackathon 2022 Finalist.** Led a 6-member team to build an English pronunciation practice app using Microsoft Azure Speech Recognition and open-source phonetics libraries.

EDUCATION

Jamia Hamdard

2020 – 2024

B.Tech in Computer Science and Engineering

New Delhi

CERTIFICATIONS

- TensorFlow Developer Professional Certificate (Deeplearning.ai)
- LangChain for LLM Application Development (Deeplearning.ai)
- Advanced RAG with LangChain and LlamaIndex (ActiveLoop)

LEADERSHIP

- Technical Lead**, IEEE Jamia Hamdard Student Branch (Apr 2022 – May 2023)
- Organized technical talks, workshops, and led the quiz show at annual fest *Technozova*.
